

# List of tz database time zones

This is a **list of time zones in the tz database** release 2017c. The list is derived from the zones, links, and rules specified in *zone.tab* and the 7 "continent files" – *africa*, *antarctica*, *asia*, *australasia*, *europa*, *northamerica*, and *southamerica*. It also includes other valid entries from *thetccetera* and *backward* files.

The four columns in *zone.tab* are mapped into columns 1–4 (marked with \*) in the table below. The file contains the following comments:

World map showing time zones from thetz database version 2017a

```
# This file contains a table with the following columns:
# 1. ISO 3166 2-character country code . See the file 'iso3166.tab'.
# 2. Latitude and longitude of the zone's principal location
#    in ISO 6709 sign-degrees-minutes-seconds format,
#    either +-DDMM+DDDMM or +-DDMMSS+DDDMMSS,
#    first latitude (+ is north), then longitude (+ is east).
# 3. Zone name used in value of TZ environment variable.
# 4. Comments; present if and only if the country has multiple rows.
```

The UTC offsets (columns 6 and 7) are parsed from the "continent files" and accordingly [ISO 6709](#) are in the format `{+|-}hh:mm` where the sign is + for east of UTC or - for west of UTC, and *hh* and *mm* are hours and minutes, respectively. The *UTC DST offset* is different from the *UTC offset* for zones where [daylight saving time](#) is observed (see individual time zone pages for details). Note that the UTC offsets are for the current or upcoming rules, and may have been different in the past. For a complete and accurate history of each time zone, refer to the data and commentary in the TZ database itself.

Additionally, each zone is categorized as follows:

- Canonical - The primary preferred zone name.
- Alias - An alternative name, which may fit better within a particular country
- Deprecated - An older style name, left in the tz database for backwards compatibility, which should generally not be used.

The table is sorted by TZ by default.

## Notes

- The [Asia/Kashgar](#) entry in the [tz database](#) reflected the use of [Xinjiang Time](#) by part of the local population. Consider using [Asia/Shanghai](#) for Beijing Time if that is preferred.
- The [Europe/Simferopol](#) entry in the [tz database](#) includes the disputed 2014 transition from Ukraine Time to Moscow Time related to the [Annexation of Crimea by the Russian Federation](#). Consider using [Europe/Kiev](#) for Ukraine Time if you disagree with this position.
